

DESCRIPTION

A soft cloud diffusing media for surface mounted applications. This new concept envelopes the fixture body in a clean contemporary architectural sweep with an accent on simplicity of design.

SPECIFICATIONS

HOUSING: All metal parts to be die-formed from prime cold rolled steel. The socket saddles are 18 guage steel for maximum wiring protection with U.L. approved contact sockets. Rugged 20 guage cold rolled steel housing die-formed provides a sturdy housing.

Ballast cover is to be of squeeze type construction to allow access without use of tools or fasteners. **DIFFUSER:** Manufactured from 100% virgin cast acrylic, a 80/20 DR formulation, which meets IES, SPI, NEMA joint specifications for acrylic materials.
