Description:

The Nulite square 60 series and round 70 series are polycarbonate formed luminaires which are ideal for high traffic areas. The lens is gasketed to reduce penetration of dust, moisture and insects.

Specifications:

Construction: The housing is one-piece black injection molded polycarbonate. Optional white housing is available. Standard gasketed lens is white injection molded polycarbonate with an optional clear prismatic polycarbonate.

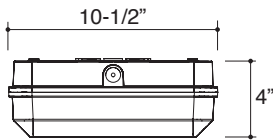

Reflector / Ballast: Pan is finished with a high reflectance white paint. Integral electronic ballast is standard.

Lamping: 1 or 2 lamp compact fluorescent. Luminaire can be ordered with lamps, consult factory.

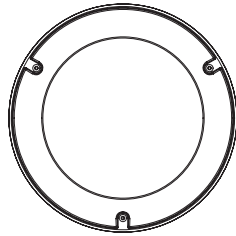

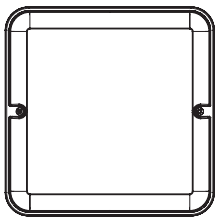

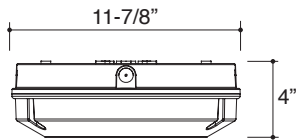

Mounting: Surface

Labels: UL / cUL listed, suitable for Damp locations, Wet location is optional.
